Baseball team from Old Second Ward - 1908

Hamilton County Historical Society

Model Mill company truck in Plum Prairie - 1910s

Roberts Collection

Burdick Tire plant construction in Midland - 1919

Roberts Collection

**CENTRAL SQUARE** - center of the original plat, which was bordered by the river on the west, Harrison Street on the north, 12th Street on the east and Cherry Street on the south. None of these streets had names at that time. The area was planned by Conner and Polk to be the central business district and the first construction in town occurred here. The buildings now in the area were built largely in the 1860s-1890s. The area has been seriously altered in the last 30 years.

**PIONEER HOMESTEAD** - many of the town's founding fathers built their homes in this area. Several houses still exist that were probably constructed in the 1850s-1860s. The area includes Riverside Cemetery, the first town cemetery, which was originally platted to be a residential or business area.

**FEDERAL HILL** - first platted in the 1870s, sections of it went by the names of West Noblesville and Garversville. The area got its overall name from the house that originally sat on the site of today's Riverview Hospital.

**PLUM PRAIRIE** - named for the wild plum trees that grew in the bottom land. The land was originally a series of small farms that centered on Polk Street (8th St.), the main road into town. The area changed with the addition of the north-south railroad in 1851, the east-west railroad in 1877, and the discovery of gas in 1887. It became the industrial core of the town. Much of the construction is from the 1870s onward. This area encompasses most of the old 3rd Ward.

**JOHNSTOWN** - originally William Conner's farm, it was bought by Leonard Wild and subdivided around 1870. It was unsuccessful until the gas boom created a need for affordable worker housing near the factories. Most of the construction is from the 1890s. The nickname came from the frequent flooding that occurred. This was where the majority of the African American community was primarily located.

**LINCOLN PARK** - a distinct addition to the First Ward that was created in the 1890s. Most of the construction dates from the 1890s-1910s. In 1909, the Fodrea-Malott Automobile Company was run from a carriage house at 15th and Grant Streets.

**OLD FIRST WARD** - this was focused around the land for the first Hamilton County Fairgrounds, which became the site of the First Ward School and, later, North Elementary School. Like the old Second Ward, it consisted of middle-class/mixed housing that was built in the 1870s-1900s.

**GILDED AGE** - with the growth of the southwestern industrial district, prosperous city residents began moving to this area. South 10th Street ended below Greenfield Avenue, so there was less traffic than on 8th Street. The primary growth occurred in the 1870s-1920s. Most of the more ornate homes in the town are in this area and were built during the gas boom. The high school was located on Conner Street in the 1890s.

**OLD SECOND WARD** - this is actually a subsection of the Second Ward and consisted of middle-class/mixed housing that was built in the 1870s-1900s. Many of the players for the town's early baseball teams, such as James "Scoop" Barnes and Clarence Wyant, lived in this area.

**GENTLEMEN FARMERS** - the large homes in this area were built in the 1880s-1890s as country homes for successful local businessmen. The farms, while prosperous, were usually not the primary source of income for the family. One of the largest natural gas wells in central Indiana was drilled here in 1887. It was nicknamed the "Wainwright Wonder."

**MIDLAND** - Burdick Tire moved its factory next to the Midland Railroad in 1919. The tire factory went through several owners and was finally bought by Firestone in 1936. Housing for the workers started to be built in the 1920s, when the Hare and Southeastern Additions were platted. The 1930s Noblesville Airport was near this area, on the site of the present county fairgrounds.

**NEW FRONTIER & BROADVIEW MANOR** - these houses were built in the 1940s-1950s post-World War II construction boom. Broadview Manor Addition had been created by 1947. It was in this time period that Noblesville was undergoing its first real growth in population since 1900.

Wild Opera House: Constructed 1895, demolished 1959

Zones were established according to the general age and style of the buildings within them. Most follow a natural pattern of community growth.

It is hoped that city residents will view the Zones as a starting point for creating historic districts of their own. If the homeowners want to keep the historic tone of their neighborhood, the Zones will help them identify what time period the buildings should generally reflect. In the end, the goal of this project is to encourage more involvement in historic preservation.

There have been discussions about historic preservation in Noblesville since the 1870s. However, most of the successful preservation projects have occurred since the creation of the Hamilton County Historical Society in the 1960s and the Noblesville Preservation Alliance in the 1980s. The city presently has eight buildings and four historic districts on the National Register of Historic Places.

The Zones of Significance were created as a way of establishing what resources were available for historic preservation. They are meant to be a tool for education and have no legal meaning with regard to historic districts. The

Craig house: Constructed 1893, moved and preserved 1988

The Noblesville Historic Preservation Commission was established in 2004 by an act of the Noblesville City Common Council. It is concerned with elements of development, redevelopment, rehabilitation, and historic preservation that affect visual quality in a historic district including landscapes and streetscapes of historic importance. The Commission conducts surveys and community education programs to encourage the adoption of historic districts. When a group of property owners establish a historic preservation district and agree on guidelines, the Commission presents their petition to the City Common Council and, upon approval by the Council, enforces the guidelines and encourages the retaining of the historic tone of the neighborhood.

The purpose of establishing historic districts is to safeguard the heritage of the city and county by preserving areas, which reflect elements of its cultural, social, spiritual, economic, political, engineering, archeological, and architectural history. By preserving these areas, it is an attempt to improve property values, to strengthen the local economy, and foster civic beauty and community pride.

*Zones of Significance*  
NOBLESVILLE • INDIANA

Looking at Noblesville today, a person can often see how these changes flowed back and forth. With some knowledge about the historic eras and building styles, patterns become apparent. Federal and Greek Revival buildings are in the oldest sections of town - particularly along 8th Street, which was the main road in town for Noblesville's first century. Queen Anne and Italianate style homes grandly line streets like Conner and Logan, where they were built by citizens made wealthy by the discovery of natural gas in 1887. The "outsiders" of the central city have the newer homes - built for factory workers at the turn of the century or as a part of the post-World War II housing boom.

When William Conner and Josiah Polk platted the town of Noblesville in 1823, they probably had little idea that it would grow in the way it has. Areas that were planned for business became housing, (and even cemeteries). Farms that were then beyond the city limits became a part of downtown. Factories brought prosperity into the community, but also forced demographic shifts. New roads and bridges altered the flow of traffic, turning quiet neighborhoods into major thoroughfares.

As population and social activity has increased through the years, the city has grown outward from its central core. Despite a drop during the first half of the 20th century, the city population in 2000 had grown to be almost equal to the population of the entire county in 1900. This growth, and the socio-economic changes that it brought, have created a map of Noblesville that is as clear as anything drawn by a surveyor.

# NOBLESVILLE TIMELINE

- 1802 Arrival of William Conner in area
- 1818 Treaty of St. Mary's - Delaware Indians leave
- First settlers - Horseshoe Prairie
- 1820 State capitol chosen at meeting in Conner's house
- 1823 State legislature petitioned to become county, approved
- Noblesville platted
- First regular mail delivery
- First major flood
- First brick house - William Conner's
- 1824 Noblesville becomes county seat
- First courthouse constructed
- 1826 Central Canal approved, part of Internal Improvement Act
- Roads surveyed as part of internal improvements
- Settlers begin arriving and buying land
- 1830 First census - 1,757 people in county
- Second courthouse constructed
- First burial in Riverside Cemetery
- 1836 First newspaper in the county, called The Newspaper, published
- 1837 Third courthouse constructed
- Massive financial depression hits United States
- Banks fail, Indiana goes bankrupt, canal and road projects fail
- 1840 Census: 9,855 people in county
- 1850 Census: 664 in Noblesville city limits (12,684 county)
- 1850 Cholera epidemic in Noblesville
- 1851 Incorporation as town
- First railroad in county completed to Noblesville
- Nancy Elliot, first African American born in Noblesville
- 1852 First agricultural fair
- 1860 Census: 1,115 people in city (17,310 county)
- 1861 Civil War begins
- John Evans takes handcar to Indianapolis to volunteer
- 1862 AME Church established in Noblesville
- 1864 Attempted pro-confederate rally ends in riot
- 1865 War ends - 277 known dead from county
- 1868 First baseball team organized
- Noblesville Civil War monument dedicated
- 1870 Census: 1,435 in city (20,882 county)
- 1870 Josiah Durfee builds new shop and begins constructing bridges in county
- 1871 Hook and ladder company formed in Noblesville
- 1872 Local African Americans hold huge political rally on Courthouse Square
- 1876 Sheriff's residence and jail constructed
- 1877 Railroad from Anderson (Midland) reaches Noblesville
- 1879 Fourth and present courthouse constructed
- 1880 Census: 2,221 in city (24,801 county)
- 1880 John Hoard elected Constable
- 1st African American law enforcement officer in Noblesville
- 1883 Newspaper goes on crusade against houses of ill repute
- 1886 Midland Railroad completed to western county border
- 1887 Noblesville incorporates into city, elects mayor
- Natural gas found in Hamilton County, part of statewide boom
- "Wainwright Wonder" was possibly largest well in Indiana
