

WHEN YOUR PET GOES ON THE LAWN,

REMEMBER IT DOESN'T JUST
GO ON THE LAWN...

When our pets leave those little surprises, rain washes all that pet waste and bacteria into our storm drains, and directly into our streams, rivers, and lakes. This pollutes our waterways and poses a serious health hazard.

So what should you do? Simple.

- **Pick up after your pet.**
- **Dispose of the waste properly.** Throw it in the trash or preferably in the toilet. Then that little surprise gets treated like it should.

Separate Storm Sewer Systems – What goes into storm drains flows directly into the environment, untreated.
