

WHAT YOU THROW ON THE STREET,

**ENDS UP IN OUR
WATERWAYS...**

You finish your coffee and toss the cup out the window. Then it rains, and that cup, along with thousands of cigarette butts, plastic bags, and other litter, ends up in our storm drains, ditches, and streams. Litter harms our wildlife and water quality.

So what can you do to help prevent such pollution?

- **Do NOT litter!**
- **Carry a Litter Bag** in your car at all times.
- **Pick up litter** in your neighborhood.
- **Recycle** - Take recyclable materials to the recycle bins behind Household Hazardous Waste (1717 E. Pleasant Street, Noblesville).

Separate Storm Sewer Systems – What goes into storm drains flows directly into the environment, untreated.
