Step two: o
Drill hole wi
adapter pip
plumber's t

Step three:
Place the ra
the ground.
Make sure the cinder blocks are stable.

Lawn and garden watering make up nearly 40% of total household water use during the summer. By collecting and storing water, one rain barrel will save about 1,300 gallons of water during summer months, saving you money and helping protect the environment.

So what should you do?

- **Go GREEN** - Install a rain barrel.
- **Check out our How-To Sheet** - It's available on our website so you can simply and cheaply build your own.

Separate Storm Sewer Systems – What goes into storm drains flows directly into the environment, untreated.
